All transactions on GeM 2.0 can be accessed here.

Industry sources, including MAIT and global OEMs have shared with us that Intel has been facing higher than expected market demand of their products which in-turn has resulted in industry wide supply tightness of components of computer categories. This has resulted in manufacturing delays by the OEMs and hence there could be delays in order processing / delivery for the products under Computer categories (desktop, work station, servers and storage) procured on GeM. GeM has taken cognizance of the situation and would advice the Buyers that the procurement done under Computer Categories may be exempted from the SLAs with regards to time delays. GeM would review the situation from time to time and any changes would be promptly notified to Buyer.

Buyers to take note that selection of the right Product/Service in the Marketplace is critical for creating a bid, as it benchmarks the technical specifications, as also the price – for seeking bids from sellers. You are advised to select the product/service that Best matches your specific requirement.
